MOS & Agent Mahoo: Sovereign Workspaces & Multi-Client Delivery

Shared operating foundation (MOS) paired with Agent Mahoo so AI-native solution architects can serve multiple customers concurrently with strict role boundaries and zero context bleed.

CONTROL / LAYER	IMPLEMENTATION & BOUNDARY
Tenant Isolation	PostgreSQL + row-level security context isolation and per-organization approved tool allowlists.
Identity & Auth	JWT + bcrypt authentication with RBAC role composition and explicit approval queues.
Lifecycle Structure	Repeatable Discovery -> Architecture -> Implementation -> Handoff artifacts per client engagement.
Sovereign Hosting	Runs on Hetzner, cloud Kubernetes, or on-site deployments with swappable model providers.
Commercial Path	20-minute architecture walkthrough -> First-Slice Workflow Pilot.

NEXT STEP & DIRECT CONTACT

Schedule a 20-minute technical or executive walkthrough to inspect live workflows on synthetic data.
