Agent Marvin: Small-Business Operations & Approval Boundaries

Built to help small businesses and hospitality properties operate repeatably and deliver stronger customer service while keeping humans in charge of every customer-facing and financial decision.

CONTROL / LAYER	IMPLEMENTATION & BOUNDARY
Operational Grounding	Refined over the past year by Aaron Bentley running his own motel across cloud, mobile, and on-site environments.
Human-in-the-Loop	Drafts, summaries, and triage never bypass explicit human approval for customer messages or financial exceptions.
Software Over Tokens	Stable business rules, scheduling, and database records run as deterministic code rather than raw probabilistic prompts.
Data Ownership	Supports sovereign deployments across Google Cloud, dedicated Hetzner VPS, or local on-site hardware.
Commercial Path	20-minute walkthrough -> Workflow Boundary Map -> Bounded First-Slice Workflow Pilot.

NEXT STEP & DIRECT CONTACT

Schedule a 20-minute technical or executive walkthrough to inspect live workflows on synthetic data.
